## TECHNICAL EXPERIENCE

### Momentum Learning— Back End Engineering

August 2018 - October 2018

- A 12 week immersive coding training program focused on language fluency, object-oriented programming, and project-based learning.

### Oracle, Bozeman— Marketing Analyst

July 2017 - March 2018

- Created and deployed all of Oracle's Digital Marketing for North America using HTML/CSS and Eloqua
- Selected to be on Oracle's Modern CX team where I managed the creation of all the emails and landing pages as well as the any updates to the Microsite
- Completed All of my task within stated timelines

### PFL, Livingston— Software Implementation Team Lead

June 2016 - July 2017

- Through the use of Asana and daily stand ups, led my team to deliver a 100% on time completion of all implementations
- Created and built the first implementation of PFL's Personal Marketing Center(PMC) app, which lives inside of a Clients Salesforce Instance
- Worked with Production and Customer Success teams to rebuild more efficient delivery workflows
- Built dynamic marketing materials for our clients using Javascript
